

# Appendix A: List of NPIAS Airports with 5-Year Forecast Activity and Development Cost

---

## EXPLANATION OF TERMS AND ABBREVIATIONS USED IN APPENDIX A

<b>City</b>	The city generally associated with the airport.
<b>Airport</b>	The official name of the airport or designated abbreviation.
<b>LocID</b>	The unique airport location identifier for an airport.
<b>Ownership</b>	Indicates airport ownership: PU Public PR Private M Military (Army, Navy, Coast Guard) NA Native American
<b>Hub Type</b>	The term “hub” is used by FAA to identify very busy commercial service airports as measured by passenger enplanements. Primary commercial service airports are grouped into four categories. Large hubs are those airports that each account for at least one percent of total U.S. passenger enplanements; medium hubs for between 0.25 percent and one percent, small hubs for between 0.05 percent and 0.25 percent, and non-hubs for less than 0.05 percent of all enplanements, but more than 10,000 annual enplanements. L Large Hub M Medium Hub S Small Hub N Non-Hub
<b>Role</b>	One of four basic airport service levels which describe the type of service that the airport currently provides to the community and is anticipated to provide the community at the end of the 5-year planning period. The service levels also represent funding categories for the distribution of Federal aid. New airports opening beyond the 5-year period are not shown in Appendix A; however, any 5-year costs associated with the development of these airports are included in Table 9. P Commercial Service – Primary CS Commercial Service – Non-Primary R Reliever Airport GA General Aviation Airport
<b>Enplaned</b>	The number of revenue passengers forecast to board aircraft at the airport during the fifth year of the 5-year planning period.

- Bsd Acft*** The number of locally owned aircraft hangared or based at the airport. Included in these counts are single-engine; multi-engine; jets; and helicopters as reported by the airport and verified by the N number registry. Not included in these totals are: military aircraft, ultra-lights, gliders, and balloons.
- Dev Cost*** The estimated 5-year costs for airport improvements that are eligible for Federal development grants under the Airport Improvement Program. The costs identified are for development only; approximately \$775 million in planning costs are excluded from the development estimates. Planning costs have increased 137 percent from the last report (\$448 million).
- Note:** The data presented in these tables were largely compiled in 2009 with a few updates through February 2010.

## New Airports Anticipated to Open Within 5 Years
